

NHS Dental Treatment

At mydentist, we believe everyone deserves access to high-quality affordable dentistry. That's why we offer three tiers of affordable dentistry - **NHS dental care**, [myoptions private dental care](#) and [Premium private dental care](#) - so you can choose the level of care that best suits your needs and budget.

Learn more about how much you could pay for your NHS dental treatment and what services are covered by the NHS. The NHS provides any **clinically necessary treatment** needed to keep your mouth, teeth and gums healthy and free of pain. For most patients, this will **examinations**, rudimentary treatments, and **preventative care**. However, the NHS does also offer fillings, root canal work, extractions, and dental appliances where clinically necessary. The costs associated with these treatments will vary depending on which region you reside, please use our guide below to learn what treatment is available to you as an NHS patient.
